

WESTERN ROLLER SHADES

Western Roller Shade Collection offers an easy-to-use shading solution with modern flair. In this collection, you'll find sophisticated colors and high-end roller fabric textures. All fabrics in the collection can be made as roller shades.

The collection offers over 400 patterns that include sheer, light-filtering, blackout, and printing fabrics. These fabrics feature stylish designs, rich textures, and classic patterns. The opacity is available in 1-4 levels.

Level 1: 1%-35%, Level 2: 36%-54%, Level 3: 55%-99%, Level 4: 100%. Sunscreens are available in 1%, 3%, 5%, 6%, 8%, and 10% openness options. Exclusive prints are also available in both light-filtering and blackout options.

The collection makes child safety simple and can be paired with our Exact or Easy lift. Cordless systems or wand and remote motorized control options. Top treatments for the collection include arc or square cassettes and fabric-wrapped cornices.

Choose us and enjoy peace of mind, we have a 5-year warranty on workmanship and quality, and make every effort to ensure that our customers are 100% satisfied.

DEDUCTIONS:

INSIDE MOUNT

A 1/8" deduction will be taken for shades with a cassette ordered as an inside mount.

A 1/8" deduction will be taken for shades ordered open roll as an inside mount.

A 1/4" deduction will be taken for shades ordered open roll as an inside mount with an end cap.

OUTSIDE MOUNT

When outside mount shades are specified, no factory deductions are taken from the end of the cassette with an end cap or the bracket-to-bracket measurement with an end cap.

Aluminum sill channel: \$5.00 / FT X width of shade

Roller Shade Measuring & Ordering Instructions

Selecting the Type of Mounting:

Determine whether the shade is going to be installed inside the window frame (IB) or outside the window frame (OB).

Inside Mount (IB):

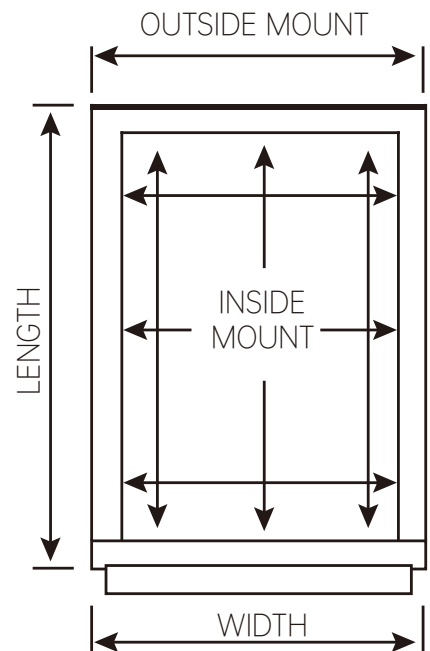

Inside mount installations are often preferred because the shade take up less space in the room.

Measuring the Width and the Length for Inside Mount:

For the width, measure across the top, middle, and bottom of the window opening. Using the narrowest dimension, measure to the nearest 1/8".

For the length, measure the up and down dimension on the left, center, and right. Use the shortest length measurement, measuring to the nearest 1/8".

Do not make any width deductions. The factory will make the appropriate deductions. See the deduction information below.

Outside Mount (OB):

Outside mount installations are mounted on the wall or on the window molding. It is best to overlap the window opening at least 1 1/2" on each side when measuring for roller shades.

Measuring the Width and the Length for Outside Mount:

Measure the area that the shade is to cover. For roller shades it is recommended to overlap the window opening by at least 1 1/2" on each side for a total of 3". To allow for enough space for the mounting brackets and to cover the bottom of the window, the suggested overlap for a roller shade varies depending on the size of the shade and the valance option that is selected. If the window opening has a sill, measure from where the top of the shade will be located to the top of the windowsill.

Confirming Measurements:

The most common error in ordering shades is reversing the width and the length measurements. Always confirm that the width is the measurement that goes across from left to right and that the length is the measurement that goes from top to bottom. List the width measurement first (W x L).

The fabric has obtained the following standards and systems

ISO 14001

- ISO 14000 Series is developed to promote the improvement of global environmental quality.
- Strengthen the environmental awareness, management capabilities, and safeguard measures of organizations (companies, enterprises)

ISO 9001

- ISO 9001 sets standards not only for quality management systems but also for the overall management systems.
- Strengthen the internal management of enterprises, stabilize business operations, and reduce technical or quality fluctuations caused by employees resigning. Improve corporate image.

GREENGUARD

- Fabrics with Greenguard Certification are produced using methods that have low chemical emissions and are compliant with key chemical emission standards.
- The Greenguard Certification applies to all fabrics.

OEKO TEX 100

- Fabrics with the OEKO-TEX certification have been tested for harmful substances and toxic chemicals.
- The OEKO-TEX Certification applies to all fabric types except printed fabrics.

Flame retardant fabrics have obtained the following standards and systems

NFPA 701

- Fabrics with the NFPA 701 certification have been tested for flammability under specified fire test conditions.
- The NFPA 701 certification applies for all Solar fabrics.

Cal 19

- Internationally recognized certification services enable you to demonstrate your products, and processes.
- systems or services comply with national and international regulations and standards.

FABRIC SHADING RATE

SHEER FABRICS(AJR/JR/YAJR/YJR)

- Allows light to pass through the fabric, allowing you to see the outdoor scenery through the fabric, while also having a certain shading function for the interior.
- Find opacity ratings in the Materials Reference table.

LIGHT-FILTERING FABRICS(GR/YGR)

- Allow light to pass through the shade and will offer various levels of privacy depending on their opacity rating. Find opacity ratings in the Materials Reference table.
- The color, texture, and tone of light-filtering fabrics may change with the amount and quality of light coming through. It is important to check the fabric against the light source before ordering.

BLACKOUT FABRICS(BR/EBR/BAR/SBR)

- Block light from passing through the shade, creating a room-darkening effect. Blackout fabrics have no view-through.
- While blackout fabrics block light, they may not offer a total black-out experience due to light leaks from the necessary fabric deductions on the sides of the shade.
- Optional to use U channel to achieve complete light shading.

SUNSCREEN FABRICS(DL/DLWG)

- The light transmission effect reaches 85%-99%, the openness option is from 1% to 10%, and it has the American standard NFPA 701 flame retardant function, which is generally a permanent flame retardant effect.
- Through special machine weaving, various pattern effects can be achieved, and the fabric styles are rich.
- Made of environmentally friendly and pollution-free fabrics.

FIRE RETARDANT FABRICS (ZJR/ZBR)

- The fabric passes the American standard NFPA 701 flame retardant, and there are options for light-filtering and black-out fabric properties.

ROLL DIRECTION

STANDARD ROLL

- Shade fabric comes off the back of the roll.
- Standard roll allows the shade fabric to be closer to the window which is best for increased privacy and light blockage.
- NOTE: The back of the fabric will show on the shade roll.

REVERSE ROLL

- Shade fabric comes off the front of the roll.
- Reverse roll allows the shade fabric to be further from the window which is best for clearing obstructions that may interfere with shade operation.
- NOTE: The face of the fabric will show on the shade roll.

OPEN ROLL -STANDARD ROLL

OPEN ROLL -REVERSE ROLL

BOTTOMRAIL OPTION

FABRIC WRAPPED

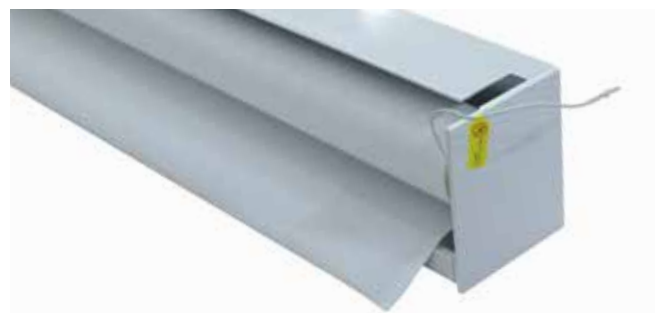

- Standard for all fabrics.

HEAT SEALED

- See exceptions in the Materials Reference table.

FABRIC WRAPPED

HEAT SEALED

SIDE & SILL CHANNELS

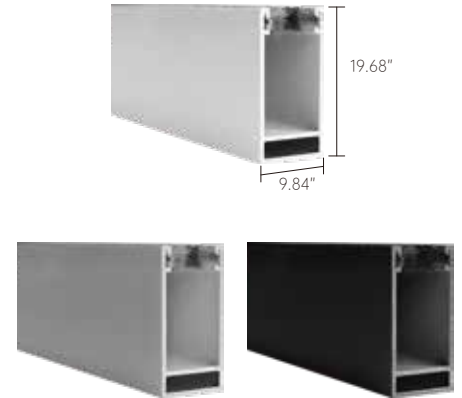

- One choice for the side channel now : Aluminium U channel (white, gray, and black).
- To achieve complete blackout, both side and sill channels are needed.
- Both suitable for fabric wrapped bottom rail and heat sealed hembar.

SIDE CHANNELS

SIDE CHANNELS & SILL CHANNEL

U CHANNEL

CONTINUOUS CORD LOOP

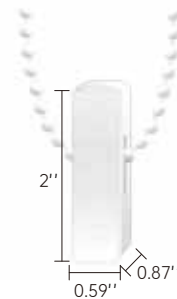

- Clutches and plastic bead chain loops are available in six coordinating colors: white, beige, gray, warm gray, bronze, and black.
- The standard chain length is 3/4 length of the shade. Custom chain lengths are available as a surcharge option
- Continuous loop chain size options: 20", 39", 59", 79", 99".
- A stainless steel bead chain is available as a surcharge option.
- The CONTINUOUS CORD LOOP shade has a maximum load capacity of 13.22 pounds. Find the fabric weight in the Materials Reference table.

SPRING ASSIST

EXACT LIFT CORDLESS

- Move and stay at any desired location by raising or lowering the bottom rail.
- Suitable for side-by-side installations for exact alignment.
- Available with clear hem grips.
- A telescoping pole is available as a surcharge option.
- The cordless shade has a maximum load capacity of 8.818 pounds. Find the fabric weight in the Materials Reference table.

HEM GRIPS

HEM GRIPS

EASY LIFT CORDLESS

- Rise automatically once spring is released by pulling the tassel or bottom rail.
- Not recommended for side-by-side installations where exact shade alignment is required.
- Available with either colored tassels or clear hem grips.
- A telescoping pole is available as a surcharge option.
- The cordless shade has a maximum load capacity of 8.818 pounds. Find the fabric weight in the Materials Reference table.

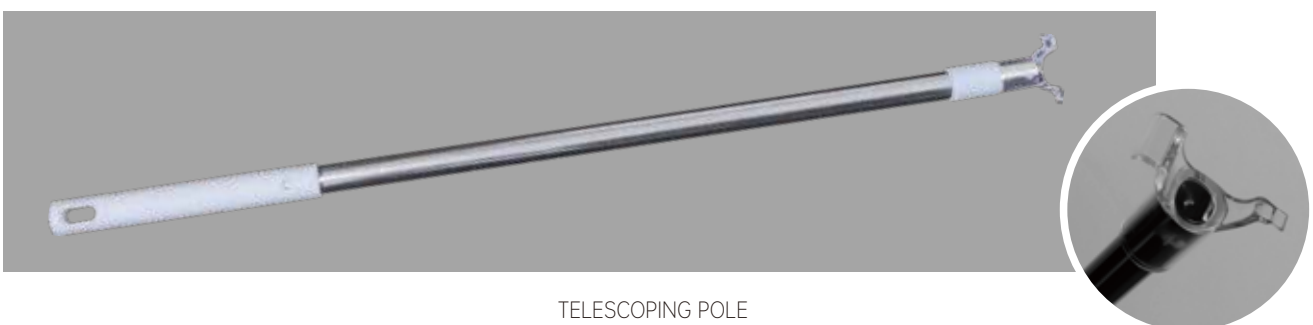

TASSEL COLORS

TASSEL COLORS

TELESCOPING POLE

- A 45" telescoping pole can be used to lower and raise shades.

TELESCOPING POLE

WAND MOTOR

- Wand control shades are powered by a rechargeable battery motor and are operated using a wand, which hangs to the side of the shade.
- Wand control is a good alternative to cordless when the window or shade size makes it hard to raise or lower the shade.
- Mini-USB charging port for the motor battery is located on back of the wand handle.
- 5 available wand colors: white, beige, gray, bronze, and black.
- 4 available wand lengths: 24", 36", 48", and 60".
- The wand motor shade is suitable for the following wand motors.

WAND MOTOR
SHADE

CONNECTION DETAILS

WAND COLOR

BUTTONS

USB CHARGER

CHARGER

WAND MOTORS

REMOTE MOTORIZED

LITHIUM-ION BATTERY MOTOR

- Motor powered by rechargeable lithium-ion battery.
- Shade battery is recharged via a mini-USB port in the motor head.

LITHIUM-ION BATTERY MOTOR

QUIET-LIFT LITHIUM-ION BATTERY MOTOR

- Upgraded rechargeable lithium-ion battery motor that features a more quiet and powerful lift.
- Shade battery is recharged via a mini-USB port in the motor head.

QUIET LIFT LITHIUM-ION BATTERY MOTOR

AC MOTOR

- 100V - 240V AC motor with built-in transformer.
- An electrician may be required before installation.

AC MOTOR

CE MOTOR (External lithium battery motor)

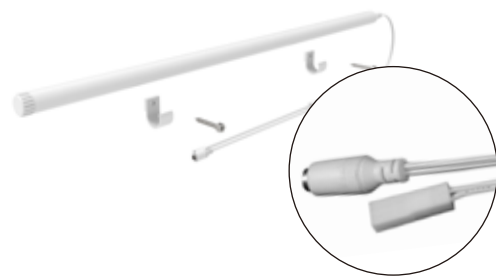

- 12V CE motor.
- Powered through an external battery pack.
- Because the battery pack is external, shades powered by DC motors can be made in narrow widths.(16.5")
- Can be matched with the following 2 battery pack.

EXTERNAL LITHIUM BATTERY MOTOR

RECHARGEABLE LITHIUM BATTERY PACK

RECHARGEABLE BATTERY PACK

CONTROL OPTIONS

There are 2 kinds of controls a Wall switch and a Remote.

All motorized shade collections use the same motor type and can be controlled with the same Remote/HUB.

REMOTE CONTROL

- Single and multi-channel remotes

Single-channel remotes have only 1 channel and the channel can operate 15 shades.

Multi-channel remotes have 15 channels. Each channel can operate 15 shades at most. Channel 0 will operate 15 channels at the same time.

- Single and multi-channel wall switch

A single-channel wall switch will have 1 channel and the channel can operate 15 shades.

The channel can operate 15 shades mostly Multi-channel switch has 15 channels. Each channel can operate 15 shades at most.

SINGLE CHANNEL REMOTE

MULTI-CHANNEL REMOTE

SINGLE CHANNEL WALL SWITCH

MULTI-CHANNEL WALL SWITCH

SMART HUB CONTROL

· HUB is the intermediate hub connected to the mobile phone app. The transmission distance range is between 82-114 feet.

All motors can be connected to HUB through Amazon Alexa, Control4, Google Home, IFTTT, RTI, Samsung Smart Things, and Siri Short Cuts to control shades.

We suggest ordering 1 hub per floor. Hubs are shipped with a 48" Ethernet cable and a 40" power cable.

We have the Mini Bridge and the P-Box-give a description of each. P-Box (DD7006) is an evolved new generation of hub enabling adaptable and reliable interaction of motorized window covering systems with cloud ecosystems such as Amazon Alexa, Google Assistant, IFTTT, Smart things, etc, main features include: - Straightforward LAN cable connection, or alternative Wi-Fi; - Hub configuration via BLUETOOTH (bt 4.2) from Smartphone, DIY/installer friendly; - Compatibility to home automation system, such as Control4, Crestron, ELAN, URC, RTI, etc.

Mini bridge is a Wi-Fi to RF+ interface. It builds a connection via the user's Wi-Fi router at home and enables the user to control motorized window covering and sunshading products with designated smart-phone applications and interaction with the ecosystem such as Amazon Alexa, Google Assistant, .etc, via cloud API.

Pro HUB(WIFI and Cable)

69

CONNECTOR+ APP

Connect HUB with Google home, Alex, etc. (Remark when ordering the HUB)

SOLAR PANEL

- Under the premise of no additional charging, if the shade is charged only by the solar panel, a certain amount of sunshine time and intensity are required. If the sunshine time or intensity is not enough, there will be a lack of motor power.
- Regular glass does not affect the use of solar panels.

EXTENSION CABLE

- All motor general 8 inches extension cable.

OPEN ROLL

- Clutch and motorized open roll shades come standard with silver brackets and color-coordinated bracket covers.
- The bracket cover is available in six colors: white, beige, gray, warm gray, bronze, and black.

SILVER BRACKETS FOR OPEN ROLL

Match

BRACKET COVERS

- White, black and silver brackets are also available.

WHITE BRACKETS FOR OPEN ROLL

BLACK BRACKETS FOR OPEN ROLL

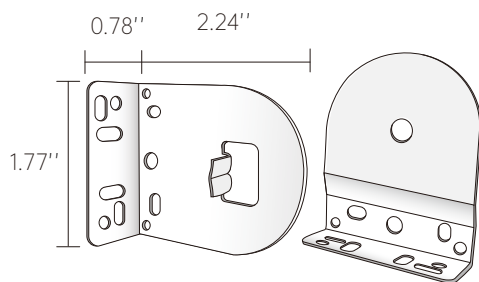

SILVER BRACKETS FOR OPEN ROLL

Note: Bracket covers are available for both inside and outside mount, factory will take an additional 1/8" deduction for inside mount with bracket covers.

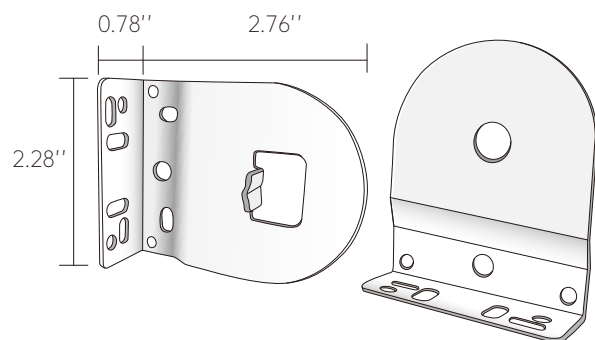

•BRACKET DIMENSIONS

Open roll uses a 2.28-inch bracket.

1.77" brackets match the 2.56" small cassette, and 2.28" brackets match the 3.29" big cassette.

SMALL BRACKET

BIG BRACKET

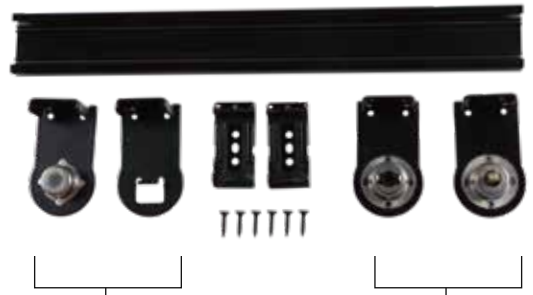

· Cordless open-roll shades are available with either white or black raceway bars, and installation brackets.

WHITE RACEWAY BAR FOR EXACT LIFT CORDLESS

BLACK RACEWAY BAR FOR EXACT LIFT CORDLESS

BRACKETS FOR EXACT LIFT CORDLESS

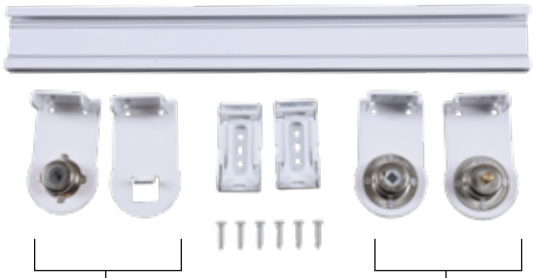

BRACKETS FOR EASY LIFT CORDLESS

WHITE RACEWAY BAR FOR EASY LIFT CORDLESS

BRACKETS FOR EXACT LIFT CORDLESS

BRACKETS FOR EASY LIFT CORDLESS

· The size of the cordless bracket, back mount or top mounted, and the size of the raceway bar.

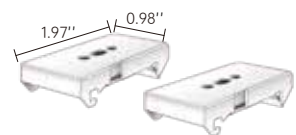

CORDLESS MOUNTING DIMENSIONS

Maximum light gap 0.79" (standard roll, from fabric to bracket back) when the shade is fully extended.
For reverse roll, see flush mount depth.

CORDLESS SHADE (TOP MOUNT)

Maximum light gap 1/2" (standard or reverse roll, from bottom of the head rail to the top of the fabric) when the shade is fully extended.

CORDLESS BRACKET

(no cassette)

CASSETTE OPTIONS

ARC CASSETTE

- Available in 3" and 4" sizes. The maximum width 90" and length 78" for a 3" cassette .
- Available in 6 colors: white, beige, gray, warm gray, bronze, and black.
- Fabric insert can be custom ordered in any fabric.
- Standard roll only.
- For inside mount or back mount, the depth of the window frame should be more than 3.3 inches for small cassettes and more than 4 inches for the big cassettes.

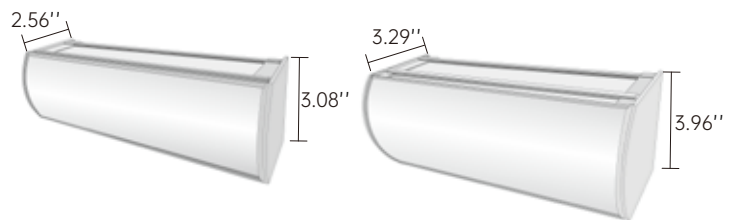

SQUARE CASSETTE

- Available in 3" and 4" sizes. The maximum width 90" and length 78" for a 3" cassette.
- Available in 6 colors: white, beige, gray, warm gray, bronze, and black.
- Fabric insert can be custom ordered in any fabric.
- Standard roll only.
- For inside mount or back mount, the depth of the window frame should be more than 3.3 inches for small cassettes and more than 4 inches for the big cassettes.

ARC CASSETTE

CORNICES

- Fabric-wrapped board valance which installs separately from shades.
- Installation brackets available for top (L-brackets) and wall (U-brackets) mount applications.
- Boards are 1/2" thick and are available in 4" or 6" heights up to 110" wide.
- Cornices can be installed side by side for applications that require wider widths.

CORNICES RETURN

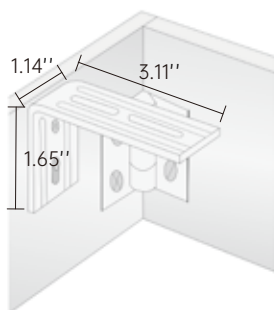

USE RETURN USED AS KEYSTONE FOR WIDER CORNICES

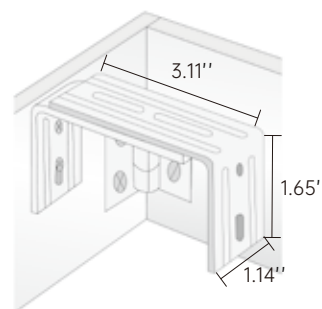

TOP BOARD CORNICE IS OPTIONAL UPON REQUEST

- The size of CORNICES side mounted or top mounted.

DUAL SHADES

CONTINUOUS CORD LOOP & MOTORIZED

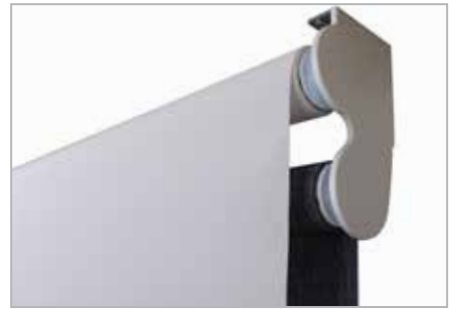

- Dual Shades are available with clutch control or remote control motorization only. Both shades being installed on the dual bracket must be ordered with the same control type and with the controls on the same side of the shade.
- Brackets are only available in silver, and bracket covers are only available in white.
- For installations that require a top treatment, 6" box valances can be ordered. For outside mount applications, order box valances with 5".returns to fully cover the dual bracket and shades.
- Not available to be ordered with cassette.
- The cordless system is not available on dual shades.

BRACKET FOR DUAL SHADES
(NARROW)

DUAL SHADE - WITH CORNICES
(NARROW)

DUAL SHADE - WITHOUT CORNICES
BRACKET COVERS INCLUDED (NARROW)

BRACKET FOR DUAL SHADES
(WIDE)

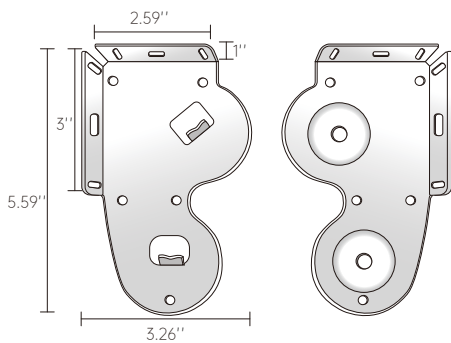

DUAL SHADE - WITH CORNICES
(WIDE)

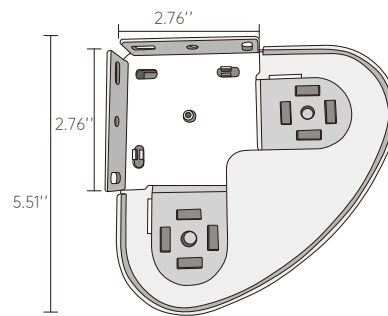

DUAL SHADE - WITHOUT CORNICES
BRACKET COVERS INCLUDED (WIDE)

- The size of dual shade bracket.

BRACKET FOR DUAL BRACKET (NARROW)

BRACKET FOR DUAL BRACKET (WIDE)

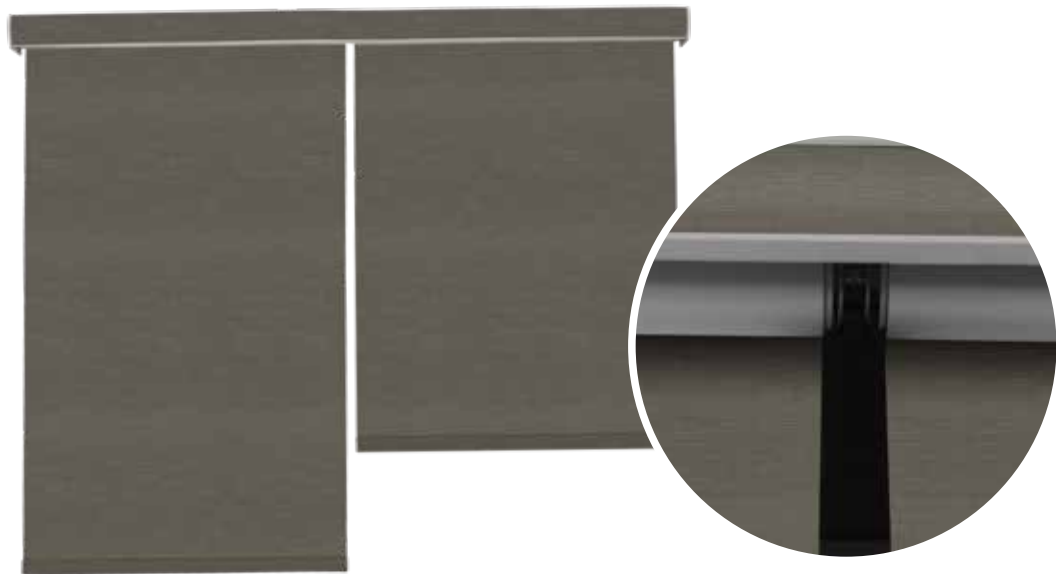

Note: The narrow dual shade bracket allows the back shade to roll as a standard roll and the front shade to roll as a reverse roll. The wide dual shade bracket allows both shades to roll as a stand roll.

Both types of brackets need the 6" cornice.

MULTIPLE SHADES IN ONE CASSETTE (2-ON-1)

CONTINUOUS CORD LOOP & MOTORIZED

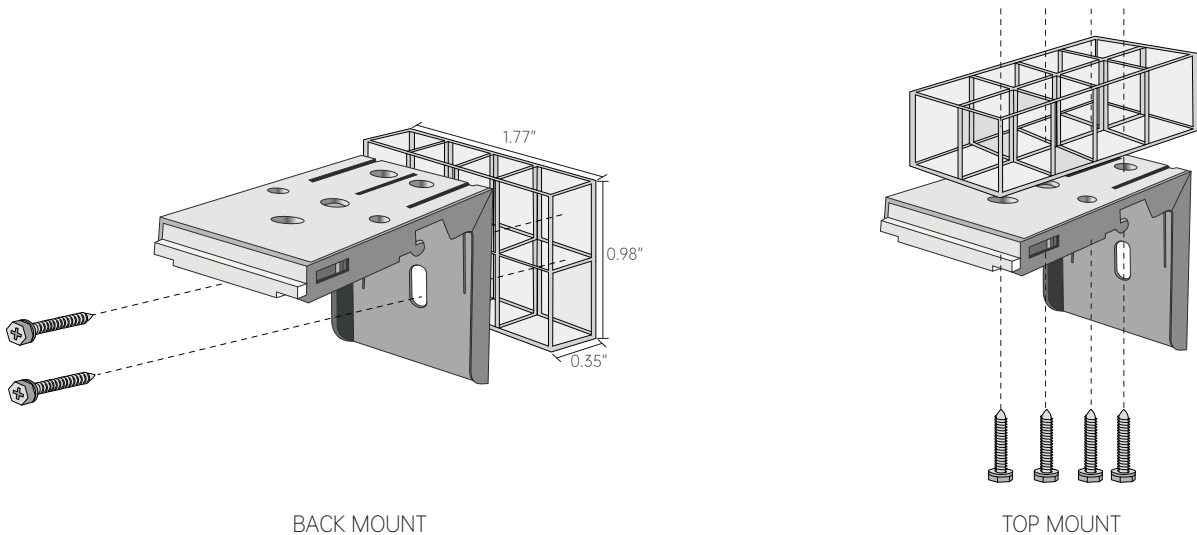

- Available with both arc and square cassettes in either 3" or 4" size.
- Controls will be on the outside end of each shade.
- Center gap of 0.98" between shades.
- Cassette inserts or wrap will be made to the maximum width of the fabric. Wider inserts must be spliced or railroaded.
- Price each shade individually. The cassette price is determined by the overall width. No additional surcharge.

EIGHT-GRID SPACER, THIN SPACER, HOLD DOWN BRACKETS

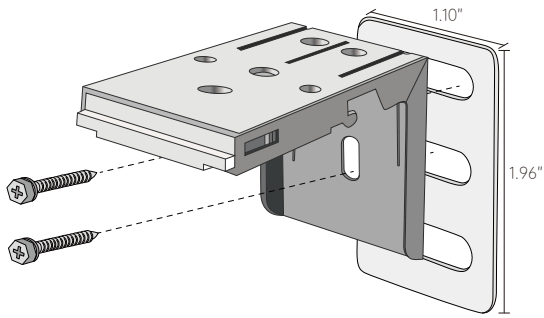

EIGHT-GRID SPACER

- Place it on the side or top of the installation code, use it when there is a wooden frame or obstruction so that it protrudes from the window frame or obstruction.

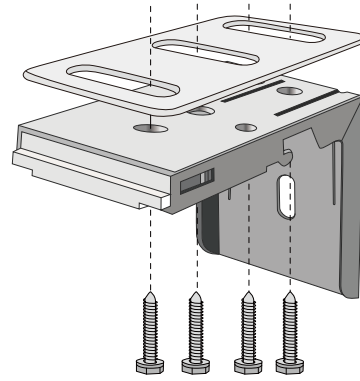

THIN SPACER

- Place it on the side or top of the installation bracket to prevent the shade from skewing when the wall is uneven.

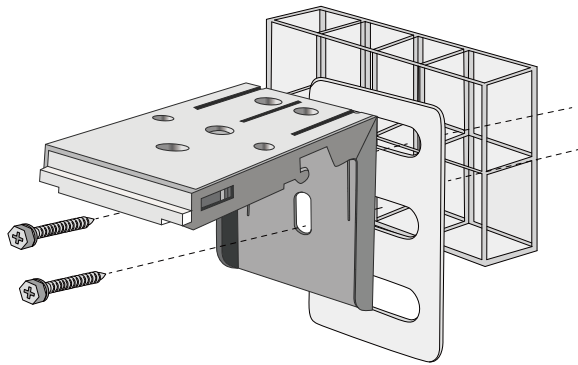

BACK MOUNT

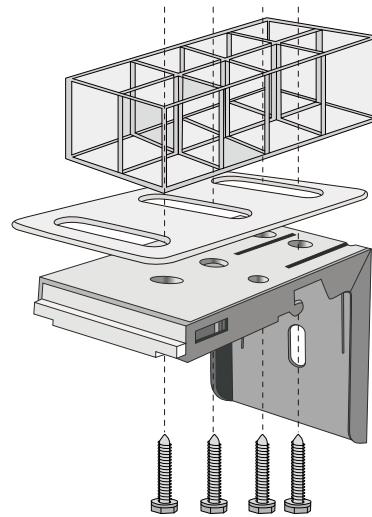

TOP MOUNT

- When the wall surface is uneven and the depth is too deep, the eight-grid spacer and the thin spacer can be used at the same time, acting on the side or top of the installation code.

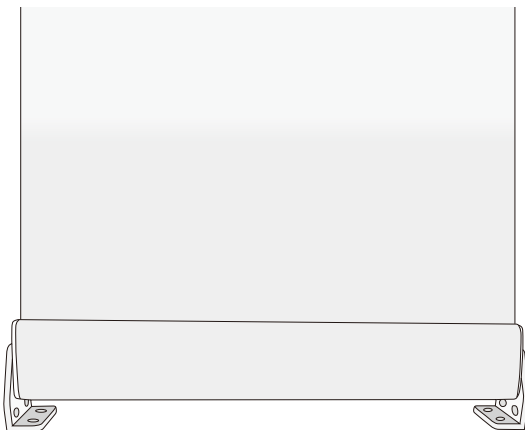

BACK MOUNT

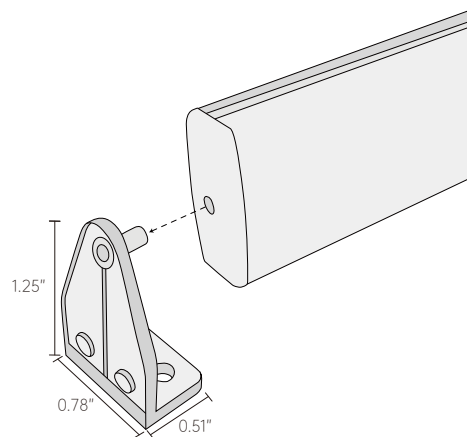

TOP MOUNT

HOLD DOWN BRACKETS

- Fixed roller shade bottom rail.
